PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Engineering student at Fatih Sultan Mehmet Vakıf University, expected to graduate in June 2026. Skilled in multiple programming languages including Java, C#, Python, and experienced with frameworks such as .NET, Angular, React, TensorFlow, and PyTorch. Completed multiple full-stack internships, including the development of a Vehicle Maintenance Workshop Management System and a university idea-sharing platform, gaining practical experience in backend architecture, database design, and responsive web interfaces. Demonstrated passion for AI and full-stack development through hands-on projects like traffic sign recognition and a food delivery web application. Trilingual in **English, Arabic, and Turkish**, with strong communication, analytical, and problem-solving skills.

TECHNICAL SKILLS

Languages: Java, C#, C++, Python, C, JavaScript, SQL, PLSQL

AI Tools/Skills: TensorFlow, PyTorch, Keras, NumPy

Libraries/Frameworks: React, ASP.NET MVC, PyTorch, TensorFlow

Developer Tools: Git, Visual Studio, VS Code, Postman, Swagger, AWS

EXPERIENCE

Software Development Intern, 07/2025 – 08/2025

Fatih Sultan Mehmet Vakıf University – Software Department

- Designed and developed “BirFikrimVar”, an interactive student idea-sharing platform using C# .NET 8 (Layered MVC Architecture) and MSSQL.
- Implemented authentication system, CRUD operations for ideas, and features like likes, comments, search, and sorting.
- Utilized Entity Framework Core, AutoMapper, and Fluent Validation for maintainable, scalable code.
- Delivered the project ahead of schedule, improving UX design and applying clean architecture principles.
- Strengthened skills in software design patterns, data validation, and full-stack development workflow.

Full-Stack Development Intern, 08/2025 – 11/2025

Mevhibe Teknoloji ve Danışmanlık A.Ş. – Istanbul (Hybrid)

- Developed a Vehicle Maintenance Workshop Management System web application for a Saudi Arabian company, enabling efficient management of vehicles, customers, employees, and maintenance operations.
- Designed and implemented backend services using .NET 9 Web API and MS SQL Server, including CRUD operations, automatic invoice generation, and stored procedures for reporting and analytics.
- Built the frontend using Angular 19, featuring modules for customer, vehicle, inventory, maintenance order, and invoice management.
- Implemented attendance-based task assignments, real-time status tracking, and dashboard analytics for monitoring performance and progress.
- Focused on clean architecture, scalable database design, and professional API documentation (Swagger) to ensure maintainability and extensibility.
- Gained hands-on experience in enterprise-level full-stack development, API integration, and system optimization.

EDUCATION

High School Diploma: 07/2022

Merkezefendi Anadolu İmam Hatip Fen Lisesi - Istanbul, Turkey

- [87/100] Average

Bachelor of Computer Science: Expected in 05/2026

Fatih Sultan Mehmet Vakıf University - Istanbul

- Coursework: Algorithm Analysis and Design, Data Structures, Database Management Systems, Operating Systems, Computer Networks, Machine Learning, Web Design and Programming, and more.
- [2.82] GPA

LANGUAGES

ARABIC – Native

TURKISH – Native

ENGLISH – Advanced Level
